QUALIFICATION

SPECIALIZATION:

- **PhD in Human anatomy and Embryology**

University of Mansoura, Egypt.

- **Master's in Human Anatomy and Embryology**

University of Mansoura, Egypt.

HONORS & AWARDS:

Best Teacher Award, Basic Medical Sciences, UBCOM, Saudi Arabia—2018

PROFILE:

Assistant Professor of Human and Clinical Anatomy at Sultan Qaboos University with a Ph.D. in Anatomy and Embryology. A fellow of FAIMER and CETL, with over 15 years of academic experience across Egypt, Saudi Arabia, and Oman. Expertise includes interdisciplinary teaching, curriculum development, psychometric assessment, and educational innovation. Research interests span liver regeneration, stem cell therapy, and medical education. Authored numerous Q1 publications and actively supervised undergraduate and postgraduate research projects. Known for integrating modern technologies into medical education and implementing advanced assessment models across curricula.

WORK EXPERIENCE

• 2019 – Present

Assistant Professor of Human and Clinical Anatomy, Department of Human and Clinical Anatomy, College of Medicine and Health Sciences, Sultan Qaboos University, Muscat, Oman.

• 2017 – 2019

Assistant Professor of Anatomy & Embryology, Department of Anatomy, College of Medicine, University of Bisha, Saudi Arabia.

• 2013 – 2017

Lecturer of Anatomy and Embryology, Department of Anatomy and Embryology, Faculty of Medicine, Mansoura University, Egypt.

• 2012 – 2017

Researcher at the Centre of Excellence of Regenerative Medicine and Stem Cells (CERMS), Egyptian Liver Research Institute and Hospital (ELRIAH), Egypt.

• 2009 – 2013

Assistant Lecturer of Anatomy and Embryology, Department of Anatomy and Embryology, Faculty of Medicine, Mansoura University, Egypt.

• 2005 – 2009

Demonstrator of Anatomy and Embryology, Department of Anatomy and Embryology, Faculty of Medicine, Mansoura University, Egypt.

• 2005

Third Rank Physician, Ministry of Health, Egypt.

• 2004 – 2005

Rotating House Officer, University Hospital of Mansoura, Egypt.

RESEARCH INTERESTS

- Liver regeneration and hepatic progenitor (oval) cell activation in experimental liver injury models.
- Stem cell-based therapies, cellular characterization, and immunohistochemical evaluation in organ-specific diseases (liver, kidney, ovary).
- Medical education assessment and psychometrics, including blueprinting and Rasch model application in curriculum-based evaluations and advanced standard-setting strategies integrating Compromise approaches with Generalizability Theory.
