

Mohammad Hadra

Mohammad Hadra is a computer engineer with an M.Sc. in computer science since 2004. He worked as a lecturer in the Computer Science Department of King Khalid University, Saudi Arabia (2004-2011). Then he worked as a chief engineer in Hydrotechnik Company GmbH, where he was mainly responsible for providing suitable solutions in remote monitoring and developing appropriate data analysis methods based on project requirements. He was also in charge of developing training for the company's customers for proposed solutions.

His extensive academic and industrial experience has substantially consolidated his knowledge in data analysis and provided him with the ability to assess the exact training gaps and develop effective training and deliver it. He joined SQU as an IT lecturer in November 2014 in the department of Math and IT.
