12. Course Description		
This is the first of a two semester course in foundation biology. A basic introductory course in biology covering the view of science, chemical basis of life, cell biology, cell cycle and reproduction, cellular energetics, diversity of life including prokaryotes, protista and fungi and the biotechnological and environmental applications of microorganisms. This course also describes the present status and future opportunities in different fields of biotechnology in Oman. Laboratory work is designed to expose students to the practical aspects of these subjects. The details of the experiments are provided in the lab manual.		
13. Teaching/Learning Strategies		
Students will be provided with lecture guides and lab manuals. All the sections will be taught with the same materials and powerpoint slides to maintain the uniformity. All the lectures are uploaded in the moodle to give regular accession for the students. The examination and grading is common to all sections. Students learn the subject using rtext book and moodle.
